PROFESSIONAL SUMMARY

Full-stack .NET Developer with 10+ years of experience delivering secure, scalable web and cloud applications using C#, ASP.NET Core, and Azure. Proven ability to streamline development, reduce bugs, and boost performance across enterprise systems. Trusted collaborator in Agile teams, known for clean architecture and fast, high-impact delivery.

TECHNICAL SKILLS

Languages & Frameworks: C#, VB.NET, JavaScript, TypeScript, ASP.NET Core, ASP.NET MVC, Blazor, Web API, .NET Framework

Front-End: Angular (1.x to 13+), ReactJS, NextJS, VueJS, Knockout.js, jQuery

Architecture & Patterns: RESTful APIs, Entity Framework, Repository Pattern, Clean Architecture, Dependency Injection, SOLID Principles, Unit of Work

Database & Storage: SQL Server, MySQL, PostgreSQL, Azure Storage

Cloud & Tools: Azure DevOps, Azure Functions, Git, IBM Acoustic, SSIS, SSRS, Visual Studio

Styling: Bootstrap, Tailwind CSS

PROFESSIONAL EXPERIENCE

Senior .NET Developer (Consultant)

Debtcol | Feb 2016 – Present

- Designed and implemented web applications using ASP.NET Core, Angular 8, and REST APIs.
- Developed and deployed scalable microservices on Azure Functions for debt collection automation.
- Integrated third-party APIs and improved system performance by optimizing SQL queries and backend logic.

KWP Group

- Built marketing and healthcare platforms using Angular 6, ReactJS, and GatsbyJS.
- Created serverless functions on Azure to automate campaign workflows via IBM Acoustic.
- Contributed to full-stack development and CI/CD implementation using Azure DevOps.

Crimcheck

- Refactored and modernized legacy AngularJS applications and ASP.NET Web API backends.
- Reduced system downtime and improved maintainability by implementing modular architecture.
- Optimized backend services and integrated DevArt ORM with Entity Framework for data access.

Compose by Decusoft

- Rebuilt legacy enterprise application using ASP.NET MVC and Knockout.js.
- Improved front-end responsiveness and database performance, enhancing UX.
- Collaborated with cross-functional teams to align UI components with business rules.

Internal Tools Development

- Engineered a code generation platform supporting multi-language project scaffolding.
- Created a Windows maintenance scheduler tool using .NET Framework and task automation libraries.

.NET Developer

Magenic Manila | Mar 2015 – Nov 2016

- Led month-end data processing tasks using SSIS and SQL Server stored procedures.
- Resolved critical SQL performance issues affecting financial report accuracy.
- Supported continuous improvement initiatives across BI and reporting systems.

Software Developer

GL Advisor | May 2014 – Mar 2015

- Developed enterprise apps using ASP.NET MVC, C#, JavaScript, and Microsoft SQL Server.
- Implemented and maintained Salesforce API integrations to streamline CRM data sync.
- Wrote and executed test cases to validate system integrity before deployments.

.NET Developer

RCG Global Services | May 2013 – May 2014

- Designed and built dynamic ASP.NET MVC web applications with SQL Server backends.

- Created RESTful APIs and reusable front-end components for client-specific solutions.

Software Engineer / Developer (Earlier Roles Summary)

Volenday / Cybesoft / Synthesis Innovations | Mar 2010 – May 2013

- Built and maintained core business systems including HR, payroll, and POS software.
- Supported legacy platforms (VB6, FoxPro) while leading migration efforts to .NET.
- Created SSRS-based reporting modules and complex T-SQL queries for analytics.
